FULL-AUTOMATIC MASK MAKING MACHINE GC-1950/2

Sample photos:

Advantage

- The whole machine adopts aluminum alloy structure, which is more beautiful and sturdy
- High stability
- Two output lines for high output

4. Fully automatic outer ear spot welding machine produces masks sheet and outer ear welding spot welding part at the same time, which can save labor. Once the non-woven fabric material is used up in the production process, the machine will automatically stop.

production line structure

A host (masks forming machine) plus two ear band welding machines (outer ear bands) are connected by a one-to-two transmission line. It can achieve the full-automatic production process from coil feeding, pressing and slitting, ear band feeding machine welding, and unloading.

Technical parameter

Machine model	GC-1950-2
Output	100-120 pieces/min
Voltage	220v,60hz, 3 phases
Machine dimension	6400*3200*1680mm ((L*W*H)
Mask size	17.5*9.5cm
Power	11KW
Weight	1700Kg

Three Tier raw material report:

Number	Melt-blown cloth	Non-woven	Non-woven	Nose bridge strip	Ear band
pictures					
scale	(Width): 17.5cm 克重(Gram weight): 20g	(Width): 17.5cm 克重(Gram weight): 20g	(Width): 19.5cm 克重(Gram weight): 25g	(Width): 3mm 厚度(Thickness): 1mm 长度(Length): 95mm	(Width): 2.5mm 长度(Length): 20cm

(Main machine configuration sheet)

1、The one-to-two full-automatic flat masks production line adopts advanced design.

It only needs to place the raw materials on the feeding rack. After the modulation is completed, the machine can automatically produce. Only one person needed to operate the packaging, which fully realizes the entire automated production. The equipment adopts ultrasonic welding method, with beautiful appearance, sanitation and environmental protection

The output is 75-100 per minutes, the length of the nose bridge strip is adjustable, and the product size error is fluctuating to 1 millimetre. According to the needs of replacing some molds, a variety of masks sheets can be achieved. This machine can produce non-woven masks, smooth cloth masks, gauze masks, activated carbon masks, double nose line masks, etc. Support 1-5 layers of non-woven masks sheet production.

- Host technical parameter

设备尺寸:	3345*630*1830mm
Dimension	

电压： Power	AC 220V,50-60HZ
生产效率： production efficiency	100~120 片/分 100-120 pieces/min
功率： Power	2.7KW

3.Configuration list of host machine (mask making part)

NO.	Name	Brand	Specification
1	touch screen	MCGS	
2	PLC	SIEMENS	
3	auxiliary relay	OMRON	
4	Circuit breaker /Contactor	CHINT	
5	Inveter	Schneider	
6	Two Button rotary switch	CHINT	
7	Inching button	CHINT	
8	Inching button	CHINT	
9	Inching button	CHINT	
10	Scram button	CHINT	
11	Frequency transformer	Customize	
12	Radiator fan	CHINA	

序 列 号 NO.	产品名称 NAME	产品图片 Photos	机器优势 Advantage
1	切割胶辐 &牵引辊 Cutter roller &traction roller		使用硅橡胶材料而不是丁腈材料。硅橡胶材料具有良好的耐磨性，不会开裂。 We use high quality rubber material, can use long time and can not damage easy.
2	触摸屏 +PLC Touch screen		西门子 PLC 系统。 Siemens brand PLC & GSGC brand touch screen.
3	鼻梁条送入装置 Ear briage input device		We use direct ear briage input device, ensure the ear briage smooth.

4	电控箱 Electric control box		<p>我们使用的是正泰电器。</p> <p>For switch we use CHINT BRAND, the best of china brand.</p>
5	电机 Motor Increase bigger power		<p>齿轮电机 GEAR MOTOR</p> <p>More bigger</p>
6	风扇 FAN		<p>我们将风扇安装在超声波喇叭附近，降低喇叭温度，延长超声波寿命。</p> <p>We use Fan to cool the ultrasonic, make it can use long time.</p>

7	超声波焊接系统 Ultrasonic system		在口罩本体机中有 1 台超声波系统。 We use one set of ultrasonic.
---	------------------------------	--	---

Ear band welding part:

Ultrasonic welding method is adopted to fuse the elastic band to the inner side of both ends of the mask body, which is the last processing procedure of the inner ear mask production. Only one operator needs to place the mask body piece by piece in the mask plate, and the equipment will automatically complete the following actions until the finished product.

This machine adopts servo step drive, drive accurate, speed adjustable

- Technical parameter

Machine dimension	1915*855*1780mm
Voltage	AC 380V,60HZ,3 phases
Production speed	50-60 pcs/min
Power	2.7KW

- Configuration list of ear loop welding part

No.	Name	Brand	Specification
1	touch screen	MCGS	
2	PLC	Siemens	
3	PLC expansion	Siemens	
4	auxiliary relay	OMRON	
5	Circuit breaker	CHINT
