FOCUS ON HIGH-END LAUNDRY

CONSIDERATE & INTELLIGENT

• Thoughtful Washing

Brand-new design laundry take more easy and efficient control ways to you, give you new definition about it. This time, we put cutting-edge on this only one laundry. Just like touch, quick start, Fuzzy system, Full stainless steel sets, UV light and more other details. You will find more by your advance step for research.

• New Design

Inverter Technology

Inverter motor, the innovation technology makes the motor stable, efficient and reduce noise and vibration during washing and spinning.

• Full Stainless Steel

Traditional plastic sets can not give more safty and great washing experience. This time we take full new stainless steel parts for all of them, giving you total different experience and enjoyment.

UV LIGHT CARE WE KNOW YOUR LIFE MORE

• UV light

Sunshine give us such beautiful world and life. This time, we take the UV into the washing. Give your eaching washing step one UV process, effective inhibition of bacteria. We are doing more to give you all many kinds easy and enjoyable life.

360° CORNER CLEANING & DRYING

• Tub Self Clean

By Tub Clean program, you can effective clean the water tub and inner tub after long time of using and to clean up impurities and foreign objects. The research shows that the washing will be bad from impurities and foreign objects after each 3 months.

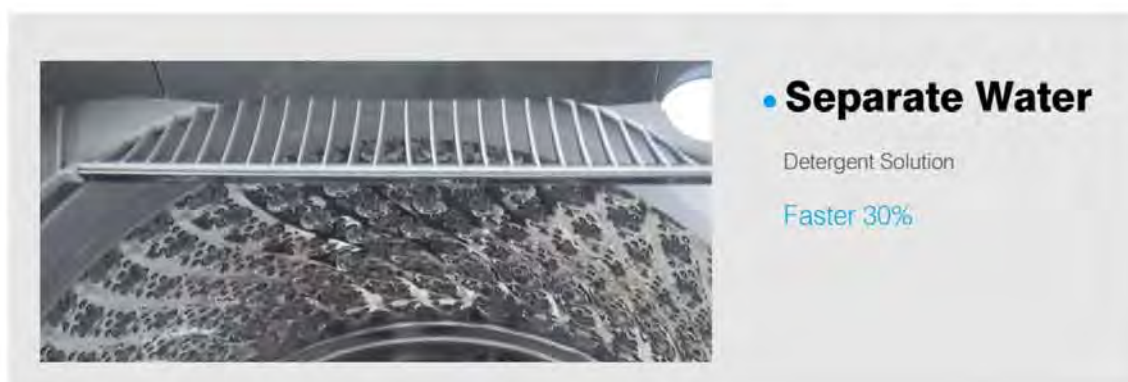

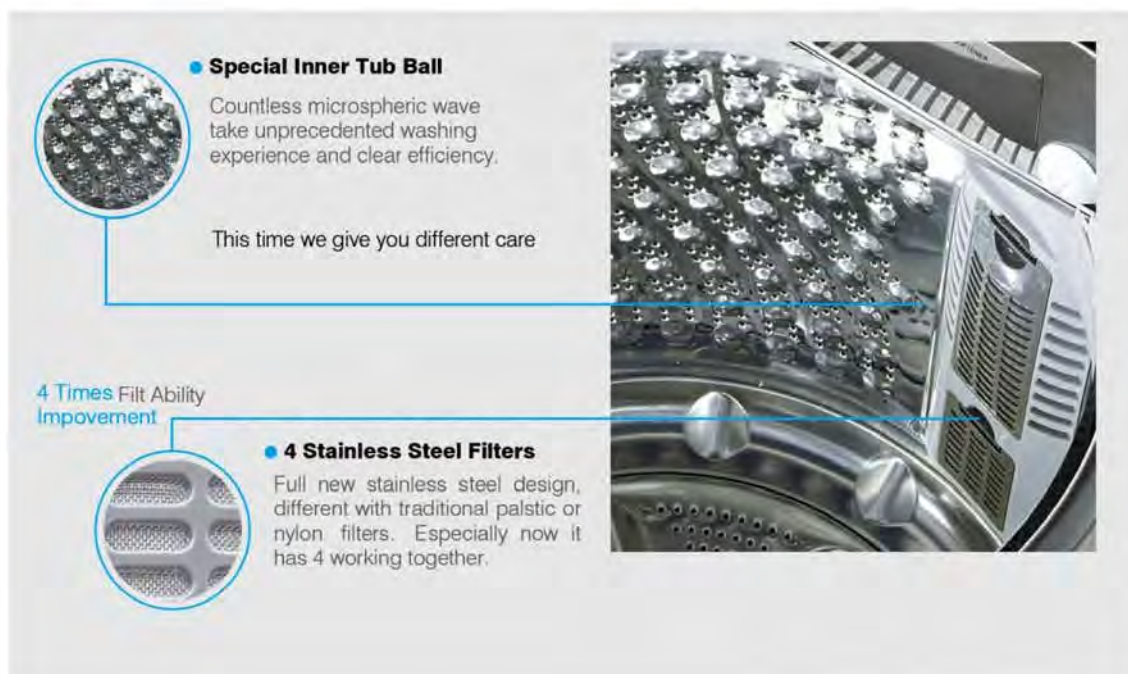

• Tub Self Dry

Each tub dry program will 100% dry the inner tub and water tub, also effective to give you all times of washing from next time.

More Details

Just produced for your health & thoughts

Fuzzy System

Washing water level will be no longer determined by your personal experience, full new generation water magic cube using clothes weight by sensing technology, set the water level according with the weight of clothes. Save precious water for your life, to create more easy and happy life for you.

THIS LAUNDRY IS DIFFERENT

It knows all you want, it has all you thought

Tempered Glass Lid

Superstrong Damper

Full Stainless Steel Sets

**Full IMD Panel
Touch Control
Chromed Handel**

Top Loading

Features

Touch Control

Full touch control panel, free your hands. Touch technology would keep the long life time of using than button control.

Button Control

Traditional button control panel with IMD technology, take the best using test for your life. Easy to operate.

IMD Panel

IMD panel is different from the traditional mechanical panel and avoid any risk of water leakage into the PCB. Any one pcs is produces by 9 steps.

Soft Closing

Machine with damper could let the lid slowly close and give more protect human in the special using to avoid hands injured. All models with this.

Fuzzy System

To automatically select the best reasonable water level for clothes weight by the intelligent internal software program and the simulated current level of motor.

24Hours Preset

Machine with this set, you could preset time from 1 to 24 hours by Preset function.

Child Lock

Child lock, one safety way to avoid and risk from the children operate the machine. Machine self would stop when any operation under the enable lock.

Finish Remind

With buzzer to remind the one complete program finish and any worn from system. At same time help you to catch clothes out soon.

Add Cloth

Give you more choices to add clothes and won't damage the machine by momentary stop which benefit from the special structure of machine R&D.

Two Water Inlets

Two water inlet, can inlet both cold and hot water to meet different washing requirement

Pump

Water drain pump, can help the machine drain out water when the floor drain is higher than water level

S.S Pulsator

Full stainless steel pulsator not only take the special feeling for washing, also give the more protect to your clothes. Also more long using life time than the traditional plastic pulsator machine design.

LCD Display

Machine with this, it means it's LCD screen display, also with full touch control. Give you more possible operation by touch, let's your hands free.

LED Display

Machine with this, it means the display is by the LED digital. Easy to show all items you would want know.

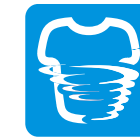

Tempered Glass

Strong tempered glass lid, could be great to protect the machine and some urgent damage using. Also have much more long using life time.

18Hours Preset

Machine with this set, you could preset time from 1 to 18 hours by Preset function.

Air Dry

The inner tub and water tub could keep dry by each time of choosing tub dry program. To against the bacteria and good for the each time of using.

Low Water Pressure

Low water pressure also could work on the machine by our special design water inlet valve, especially good for some areas have low water pressure.

Tub Dry

The inner tub and water tub could keep dry by each time of choosing tub dry program. To against the bacteria and good for the each time of using.

Tub Clean

By tub clean program, you could use the special detergent of cleaning tub to clean the inner tub and water tub, to keep the all corner clear, which good for your health.

Memory Back

Even if suddenly power break, the machine would back to the last stop point and keep washing as what you want. Give you more time to be free.

S.S Cabinet

Stainless steel color cabinet is made of PCM board, it can highly enhance machine's luxurious level

Painted Top Frame

Painted top frame, can highly enhance the glossiness and luxury of machine

UV Light

UV light, give you one high efficiency way to against bacteria, take more special way to improve your life and health by technology.

Twin Tub

THIS TIME WE BRING BIGGEST TO YOU

Features

Tempered Glass

Strong tempered glass lid, could be great to protect the machine and some urgent damage using. Also have much more long using life time.

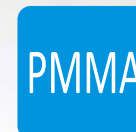

Soft Closing

Machine with damper could let the lid slowly close and give more protect human in the special using to avoid hands injured. All models with this.

ABS Panel

All twin tub machine have ABS panel which is produced by 100% new material.

PMMA Panel

Twin tub glass model have one optional panel material which is PMMA. For this model, every one panle is printed by 7 time in the internal surface.

Wash Board

The wash board is one kind of special structure for washing some stubborn stain.

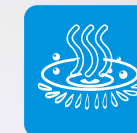

High Speed Spin

1200 rpm, which could help you to spin more enough and save more time to sun-cure.

Finish Remind

With buzzer to remind the one complete program finish and any worn from system. At same time help you to catch clothes out soon.

Spin Shower

During the spin, at the same time coming water for shower to let the spinning more efficiency and clothes be more clear.

Air Dry

By Air Dry, one time using could spin at least 96% water from clothes. And there are three options by 30, 60 and 90 minutes.

UV Light

UV light, give you one high efficiency way to against bacteria, take more special way to improve your life and helth by technology.
